

- INDEPENDENT CANDIDATE -  
**ED RUSHMAN**  
46<sup>TH</sup> CONGRESSIONAL DISTRICT

My name is Ed Rushman. Each election year, I looked for a candidate to do the job right, but never found one, so I am willing to go to Washington and "be the change you want to see in the world." I will study every proposed law, listen to your views and let you know how I voted and why. I have raised six children over the past 25 years in Orange County, spending my last ten years here in Anaheim.

I'm like you: not wealthy, I don't own a bank, or factory, or have millions to invest. I just work, and now I'd like to work for you. This is a campaign without millions of dollars, it depends completely on you. It's time for someone different, a representative for everyone who will do the job right.

### Our Lives

We are killing too many people. There is so much hate, anger and violence: police shootings, wars, euthanasia, gang violence, capital punishment, and did you know abortion is legal all the way to birth? The founders of this country desired Life, Liberty and the Pursuit of Happiness. We still want this, but if we don't respect human life, we are not free or happy.

### Our Freedom

Neither the Democrats nor the Republicans really support the Dream Act. While they sponsored the bill in Congress our 800,000 young people have been used as pawns in a political game, where only the politicians win and we lose. I will work hard to protect our young people and to bring citizenship to all those who have worked here, paid taxes, raised children, and have already earned the right to be called American citizens.

### Our World

Whether you believe in global warming or not, it makes no sense to pollute our waters, land and air. Reducing carbon emissions is good, and government action to protect this beautiful country is needed. We have recklessly interfered in other countries to enrich our leaders and their friends. I will work for less military action and better cooperation with other countries, to respect their sovereignty while also protecting our own people.

**The time for change is NOW! Do you want another career politician or someone independent who works hard like you? Please reach out and connect with me!**
